

PLANT GROWTH PROMOTORS

PROTEIN PLUS

- **Protein Plus** helps plant synthesize proteins and promotes hormonal activity which results in healthy growth.
- **Protein Plus** influences physiological activity of the plants for all crops.
- **Protein Plus** increases pollen germination.
- **Protein Plus** usage develops stress resistance.
- **Protein Plus** can be applied as foliar spray and also as soil application.

Crops : Paddy, Cotton, Chillies, Sugar Cane, Groundnut, Grapes, other horticulture crops.

MILEAGE

- **MILAGE** is highly concentrated Organic bio stimulant PGR fortified with NPK.
- **MILAGE** usage, Helps plants synthesize proteins and promote hormonal activity, which results in increased flowering and fruit formation.
- **MILAGE** usage prevents fruit and flower drop.
- **MILAGE** usage increase nutrient uptake, which results in healthy vegetative growth, which ultimately leads to higher yields.

Crops : Paddy, cotton, sugar cane, chillies, Ground nut, horticultural and floriculture crops

Dosage : 3ml / 1 litre of water at 30 - 45 - 60 days stages of crop.

SOIL APPLICATIONS

VENUS SOIL PLUS

- **VENUS SOIL PLUS** develops strong root system.
- **VENUS SOIL PLUS** Increases uptake of unutilized major Nutrients (NPK).
- **VENUS SOIL PLUS** Improves number of tillers in paddy crop.
- **VENUS SOIL PLUS** facilitates correction of Zinc deficiency, through soil application.

Crops : Paddy, Ground Nut, Sugarcane crops.

Dosage : 10 Kg/acre within 20-30 days after planting

VENUS ZINC 33%

- **VENUS ZINC 33%** contains 33% zinc in monohydrate form
- **VENUS ZINC 33%** effectively corrects Zinc deficiency in all crops.
- **VENUS ZINC 33%** establishes strong root system.
- **VENUS ZINC 33%** Usage of Venus Zinc -33% facilitates up take of nutrients available in soil.

Crops : Paddy, Cotton, Citrus & fruit crops.

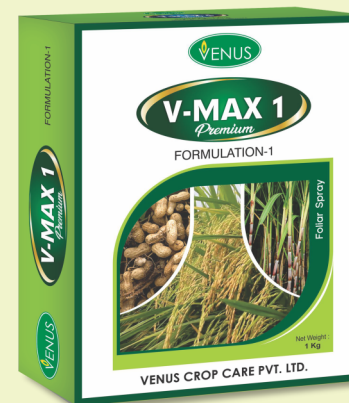

Dosage : Apply 10 kgs / acre to soil in between 20 - 30 days after sowing.

(Mix 500 grams of Zinc 33% Monohydrate provided in the bag separately to be mixed in 9.5 kgs of Filler materials.)

MICRO NUTRIENTS

V-MAX 1

- **V-MAX -1** usage produces required chlorophyll in plants.
- **V-MAX -1** usage prevents discoloration of leaves and stunted growth.
- **V-MAX-1** Corrects Zinc, ferrous and Manganese deficiencies in paddy, groundnut and sugarcane.
- **V MAX-1** usage develops immunity towards moisture stress.

Crops : Paddy, Ground Nut, Sugarcane crops.

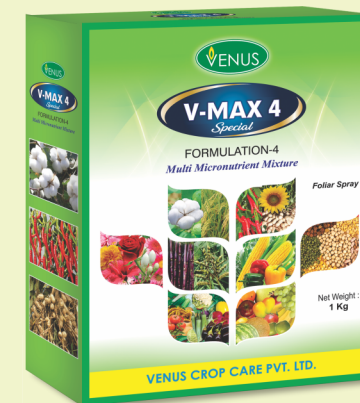

Dosage : 3 - 5 grams/ litre of water.

V-MAX 4

- **V-MAX-4** enhances uptake of NPK fertilizers.
- **V-MAX-4** improves quality, texture and shelf life of fruits and vegetables.
- **V-MAX-4** corrects all micronutrient deficiencies in soil.
- **V-MAX-4** prevents flower and fruit drop.
- **V-MAX-4** Facilitates, tolerance to moisture stress.

Crops : Citrus, fruit crops & floriculture crops

Dosage : 3 - 5 grams/ litre of water.

V-MAX 6

- **V-MAX-6** is ultimate formulation for cotton, chillies and vegetables.
- **V-MAX-6** Corrects wide range of all important micro-nutrients which are necessary at different stages of crop.
- **V-MAX-6** Improves yield and quality of the produce.
- **V-MAX-6** usage facilitates the process of photosynthesis

Crops : Cotton, Chillies & Vegetables.

Dosage : 5 ml in 1 litre of water.
